

## FAST AND FORGIVING

### **The Fittipaldi EF7 Vision Gran Turismo by Pininfarina – powered by passion and technology**

Turin, February 13<sup>th</sup> 2017 - Motor racing legend **Emerson Fittipaldi** today revealed that the body and the monocoque of the much-anticipated new **Fittipaldi EF7 Vision Grand Turismo by Pininfarina** will be made from carbon fiber, giving it a unique advantage on the track in terms of both speed and creating a safety capsule around driver and passenger.

*"What was important to me in creating the EF7 is that the car not only provides pure passion and adrenaline but will also be forgiving and safe for drivers of all skill levels,"* said Fittipaldi from Monaco where he is attending the Laureus Sports Awards.

As such, the EF7 will be super lightweight (around 1000kgs), meaning that speed in the straightway and nibble and quickness to enter & exit corners will be extraordinary while safety standards, enhanced by the strength of carbon fiber, are of the highest possible consideration.

Fittipaldi also revealed that the powerful V8 normal aspirated engine, with over 600 hp, will give a powerful but progressive acceleration. Both engine and gearbox are "Fittipaldi" single manufacturer-made and seamlessly integrated, while their low design and position on the car creates a unique center of gravity.

*"Owner-drivers can expect reliability, lower maintenance cost and minimal mechanic and tech teams - which means more time and elation on the track,"* added Fittipaldi.

The limited edition EF7 track car is being developed in collaboration with **Pininfarina** and **HWA**, and will also be available in the Gran Turismo series, the Sony PlayStation racing franchise.

The **Fittipaldi EF7 Vision Grand Turismo by Pininfarina** will be presented on **March 7<sup>th</sup> 2017** at the **Geneva International Motor Show** on the **Pininfarina stand**.

Further details of the **Fittipaldi EF7 Vision Grand Turismo by Pininfarina** will be revealed in the next days on:
