

## Pininfarina signs Global Evo, the new coordinate measuring machine by Hexagon Metrology

*Better scanning performance, throughput and productivity combined with Italian design*

Turin, 6 October 2015 – At the EMO 2015 in Milan, the world machine tool exhibition, **Pininfarina** and **Hexagon Metrology**, leading provider of products and services for all industrial metrology applications, launched today **Global Evo**, the first result of their collaboration.

Global Evo is a new **best-in-class coordinate measuring machine**, tailored specifically to offer process speed and efficiency to manufacturers requiring accurate tactile scanning and high throughput. Global Evo features significant technological innovations that ensure a performance improvement in terms of speed and accuracy. Pininfarina has worked on the **design identity of the machine**, aiming to **highlight the leading-edge technological content** of the project developed by Hexagon Metrology.

The study of the Pininfarina team focused in particular on the vertical measurement axis, a key element in the machine design. This element has been given a shape clearly derived from the automotive world, with elegant sports lines and surfaces. The elliptical, nearly aerodynamic section of the Z-axis effectively conveys machine speed, while the contrast between the translucent, dark front part and the painted part enhances its dynamism. Under the polycarbonate band, two light strips have been added, which is a further reference to the automotive world. These multi-colour LEDs indicate the machine status from far away. Pininfarina has also reviewed all other machine covers, adding consistency and stability to its aesthetics.

*“Our main goal as designers is to dress technology”* declares **Francesco Lovo**, Vice-President Operations. *“The design of the Global Evo thoroughly expresses the innovation in terms of technology and performance”*.

*“Design and performance are inherently linked”* affirmed **Fabio Calorio**, Sales and Marketing Manager Pininfarina Extra. *“When you can see attention to detail on the outside, you know that the technology within is designed with the same levels of care. Our shared passion for innovation and speed makes our partnership long-lasting”*.

Technological excellence, best-in-class performance, timeless design. GLOBAL EVO from Hexagon Metrology. Designed for speed.
